Experience (personal projects)

- [Online Movie Database \(click to view deployed\)](#) full stack SPA web application.
 - Web application that gives the users the ability to browse movies/tv-shows/actors comment about each and every one of them, add them or remove them from favorites.
 - Uses 2 APIs. [Spring Boot GraphQL API \(Playground\)](#) - written by me and [TMDB API \(REST\)](#) - Public API. Uses PostgreSQL as a database and ReactJS on the client side.
 - The API supports different authorities with different privileges. Paid Account, Free Account, Admin.
 - The API handles the adding and removing of favorites, posting/editing/deleting/fetching comments
- [Bug Tracker \(click to view deployed\)](#) full stack SPA web application
 - Issue/Bug tracker that allows users to create projects, tickets, comment on them. Gives Project Managers the ability to assign QA to project so they can submit tickets and the ability of Developers to answer/resolve the tickets
 - Uses a single API. [Spring Boot RESTful API \(Swagger UI documentation\)](#) PostgreSQL as a database and ReactJS on the client side.
 - The API supports different authorities with different privileges. Project Manager, Developer, QA and Admin all of them have different privileges.
 - The API handles the adding and removing of favorites, posting/editing/deleting/fetching comments
- [Portfolio App \(click\)](#) single page web app
 - My personal online resume. Best way to learn more about me. It's a React App written in TypeScript.
